Backend: Node.js, Express.js, REST APIs, Firebase

Database: MongoDB, PostgreSQL, Prisma ORM

Mobile & Desktop: React Native, Expo, Electron.js

Tools & Platforms: Git, GitHub, Vercel, VS Code, OpenAI API

EXPERIENCE

Full Stack Developer — Oriole Lume, Karachi | July 2025 – present

- Built responsive UI components and landing pages with React.js and Tailwind CSS, improving overall product UX.
- Collaborated with senior developers in agile sprints, contributing to code reviews and performance improvements.
- Translated UI designs and business requirements into clean, functional, and user-friendly web interfaces.
- Implemented reusable components to improve code consistency, maintainability, and development efficiency.
- Used **Git/GitHub** for version control and collaborated with the development team on ongoing feature development.

Full Stack Developer — 3PL Dynamics, Karachi | Aug 2024 – Jun 2025

- Build cross-platform web and mobile applications with React.js, React Native, and Tailwind CSS for a logistics SaaS platform.
- Develop and maintain RESTful APIs with Node.js and Express.js, integrated with MongoDB for real-time warehouse data management.
- Implement SEO optimization and multi-language support, and manage production deployments on Vercel.

PROJECTS

PlatterOS — AI-Powered Restaurant Management SaaS — platteros.com

- Built a multi-tenant SaaS platform for restaurant operations covering menu management, order tracking, and reservations.
- Implemented multi-tenant architecture with PostgreSQL and Prisma ORM, enabling multiple clients to operate independently on a shared platform.
- Developed a real-time dashboard with sales insights and inventory tracking using React.js and Node.js.

CareerHelpp — Career Support & Student Management Platform — careerhelpp.com

- Built a full-stack platform providing job support, assignment guidance, and interview prep for UK-based clients.
- Developed role-based access for admins and students with secure authentication and lead-tracking functionality.
- Optimized performance and SEO with Next.js and TypeScript, improving load times and discoverability.

Business Management System — Desktop Application

- Built an Electron.js desktop app for inventory, invoicing, and expense management with automated business reports.
- Designed a real-time KPI dashboard with data visualization for tracking sales trends and operational efficiency.
